

# Sleigh Operation Manual

(Traditional reindeer-pulled sleigh)

*North Pole Wood Company Ltd.*

(version 2023.12)

*Dear Santa,*

thank you very much for your repeated trust in the North Pole Wood Company and our exceptional products, in particular this traditional reindeer-pulled sleigh. However, this is a personally and magically customized version of our traditional reindeer-pulled sleigh, specially selected from our premium sleigh product family and built from premium woods. Before using this sleigh, please

- make yourself familiar with this traditional sleigh,
- make your reindeers familiar with this traditional sleigh,
- prepare route and presents before you start your tour, and
- feed your reindeers... and yourself.

On Christmas Eve,

- ensure that the brakes are activated– safety first,
- turn on the sleigh lights – it’s probably already night, as always,
- attach your reindeers in the intended order to the sleigh. You know, Rudolph will be in front, so he shall be the last in proper attachment sequence,
- load and properly secure the presents,
- load the magical chimney tools – be prepared for everything, and
- jump on yourself... and start your ride.

*Your sincerely,*

North Pole Wood Company Ltd

PS: We are also looking forward to receiving some presents 😊
